

## CHEMZ **CIRCUIT CLEANER**

*European Style Formulation*

**Part No. 7135**

**Universal cleaner for removing oils and grease from contacts & electrical equipment**

- Evaporates quickly
- Repels water & moisture
- Does not attack any materials in common use
- Contains no CFC's or chlorinated solvents
- Product evaporates completely leaving a residue-free surface

**Chemz Circuit Cleaner** contains a powerful mixture of solvents that ensure gentle but effective removal of dirt, grease, wax and contaminants.

**Chemz Circuit Cleaner** has a superior wetting ability and low surface tension which enables the product to quickly penetrate into surface contaminants

The product's good penetration and flowing properties enable **Chemz Circuit Cleaner** to rinse away soiling without difficulty

### Application

Degreasing of electrical and industrial installations, appliances, equipment and components.

Particularly suitable for electric motors, high voltage switch gear, cables, switch boards and signalling systems

**Chemz Circuit Cleaner** is safe for removing silicones and coatings from cable jointing operations

### Technical Data

Colour:	Colourless
Odour:	Solvents
Density at 25°C:	0.83 g/cm <sup>3</sup>
Surface Tension:	27 mOhm
Evaporation:	Average
Residues:	None
Material Compatibility:	Good

**NB: Chemz Circuit Cleaner** has been developed for the cleaning of dissolved oxides, sulphide or carbon layers from metallic surfaces after being treated with **Chemz Circuit Reviver** Code 7174
